

ACHILLES

INFLATABLE BOATS '86

ACHILLES 1986. MORE THAN YOU'D EVER

MORE INFLATABLE

Achilles inflatables give you more of what you buy an inflatable for. They're designed to store in a minimum of space and transport with ease. They assemble quickly and easily for fast launching virtually anywhere, even without a ramp. Easy to maintain, Achilles inflatables don't require a trailer and use smaller outboards and less gas. Superior stability and buoyancy and extreme versatility are just some of the other advantages of better inflatable boats.

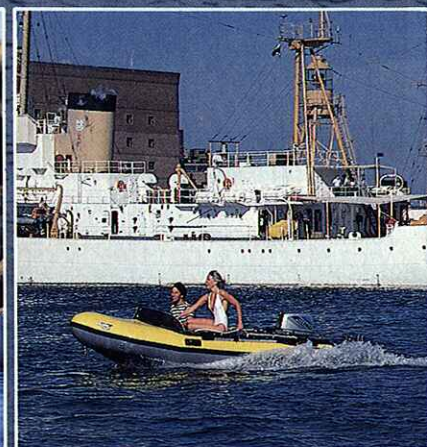

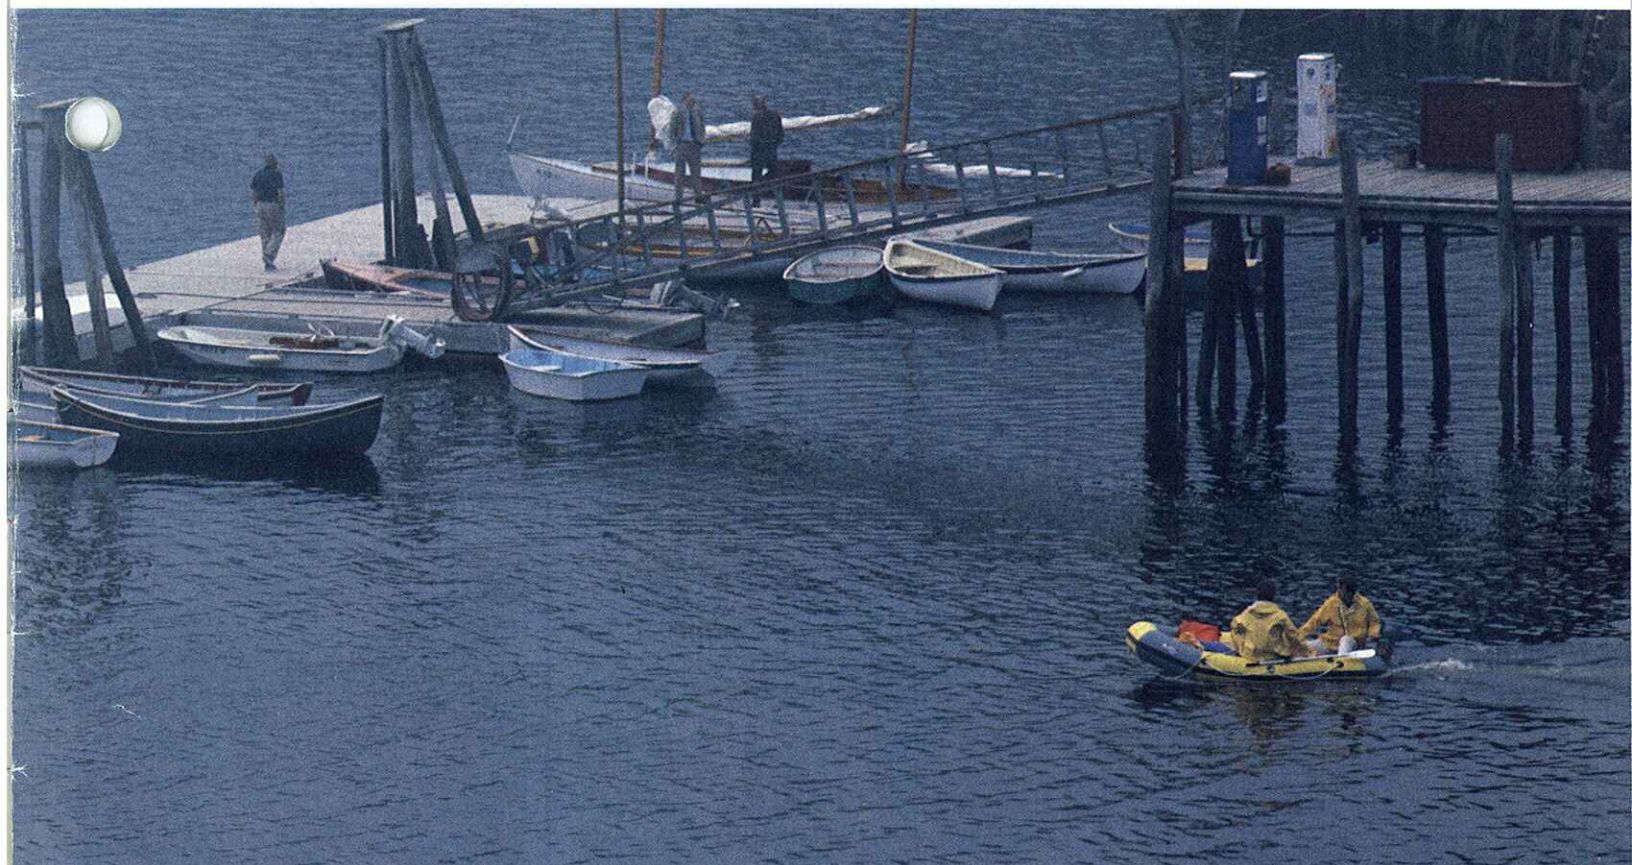

MORE DURABILITY

The fabric is the most crucial factor of any inflatable. At Achilles, a core of custom-made heavy-duty nylon is strengthened and supported by an exterior coating of tough DuPont Hypalon and two interior layers of airtight Neoprene. This four-layer process provides a fabric that resists damage from abrasions, punctures, oil, gasoline, ultraviolet rays or warm salt water while remaining completely airtight in all kinds of temperatures. Hypalon and Neoprene are universally known and proven elastomers, and not the unknown fabric compounds used on some other inflatables.

MORE SAFETY

At Achilles, we reinforce seams inside and out with seam tape while also overlapping the fabric a full inch at the seams to guarantee airtight strength. Our boats usually have more air chambers than other inflatables of the same size. From the double-capped inflation valves to the heavy-duty rubbing strake around every Achilles boat, extra steps are taken throughout the Achilles production process to insure safety.

EXPECT FROM AN INFLATABLE BOAT

MORE FEATURES

From the smallest dinghy to the largest workboat, every Achilles inflatable is made with a range of superior features designed to make that boat as functional and comfortable as possible. Achilles offers the simplicity and practicality of the fold-down, locking oar system included as standard equipment on every dinghy and sport dinghy and most sportboats. Achilles gives you the fast, easy self-locking floorboard system offered on all sportboats and sport dinghies. The list of superior Achilles features goes on and on. You will find more and better features on our inflatables.

MORE SELECTION

No one offers a wider range of recreational inflatables to choose from than Achilles. That's why you're sure to find an Achilles that's right for you no matter what your boating needs are. Whether you're looking for a reliable dinghy, sport tender, all-around utility boat, dive boat, fishing boat, high performance sportboat or whatever, there's an Achilles made for you. And because it's an Achilles, you can be sure it's made right.

MORE PEACE OF MIND

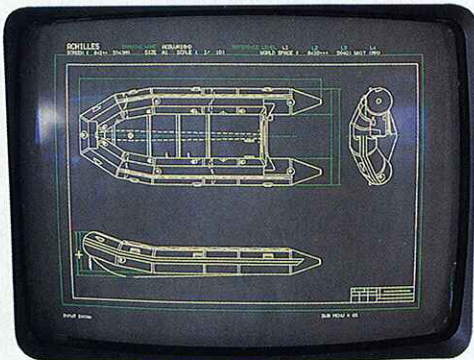

With Achilles, every boat comes with peace of mind. That's because you're choosing the best selling quality Hypalon inflatable boat in the U.S. A boat backed by a proven reputation for quality and an excellent record of safety, not to mention a full five-year limited warranty. You'll enjoy the best overall value in the industry because you're getting the most boat for your money. A boat that will perform and last. When you buy an Achilles, you know you chose the right boat even before you get it in the water.

QUALITY: OUR ONGOING GOAL.

As soon as we find a way to improve our boats, it's incorporated into our new models. How else could we continue to produce the finest boats possible. But all these changes, adjustments and refinements are made possible by the flexibility of our super modern production facility. At Achilles, there is only one level of quality: the best, and here's how we achieve the best year after year, model after model.

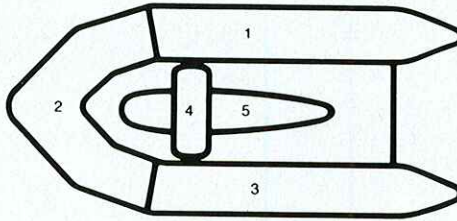

HIGH TECHNOLOGY.

Achilles Computer-Aided-Design (CAD) System allows us to develop

new designs and features as well as refine existing ones, faster and more

accurately than traditional design methods. This means we can explore many more design alternatives than others. Our computerized manufacturing system insures speed, efficiency and, most importantly, quality control. Our modern technology

ACHILLES TENDER

allows us to remain on the leading edge of inflatable boat innovation.

We have more air chambers to provide safer boating. And our air keel design gives you a smoother ride and top performance.

THE BEST FABRIC FOR THE BEST BOATS.

No fabric is tougher or more airtight than the unique fabric Achilles uses on every boat. Our exclusive heavy-duty nylon core material is further strengthened with Hypalon and Neoprene. Many others use vinyl based coatings.

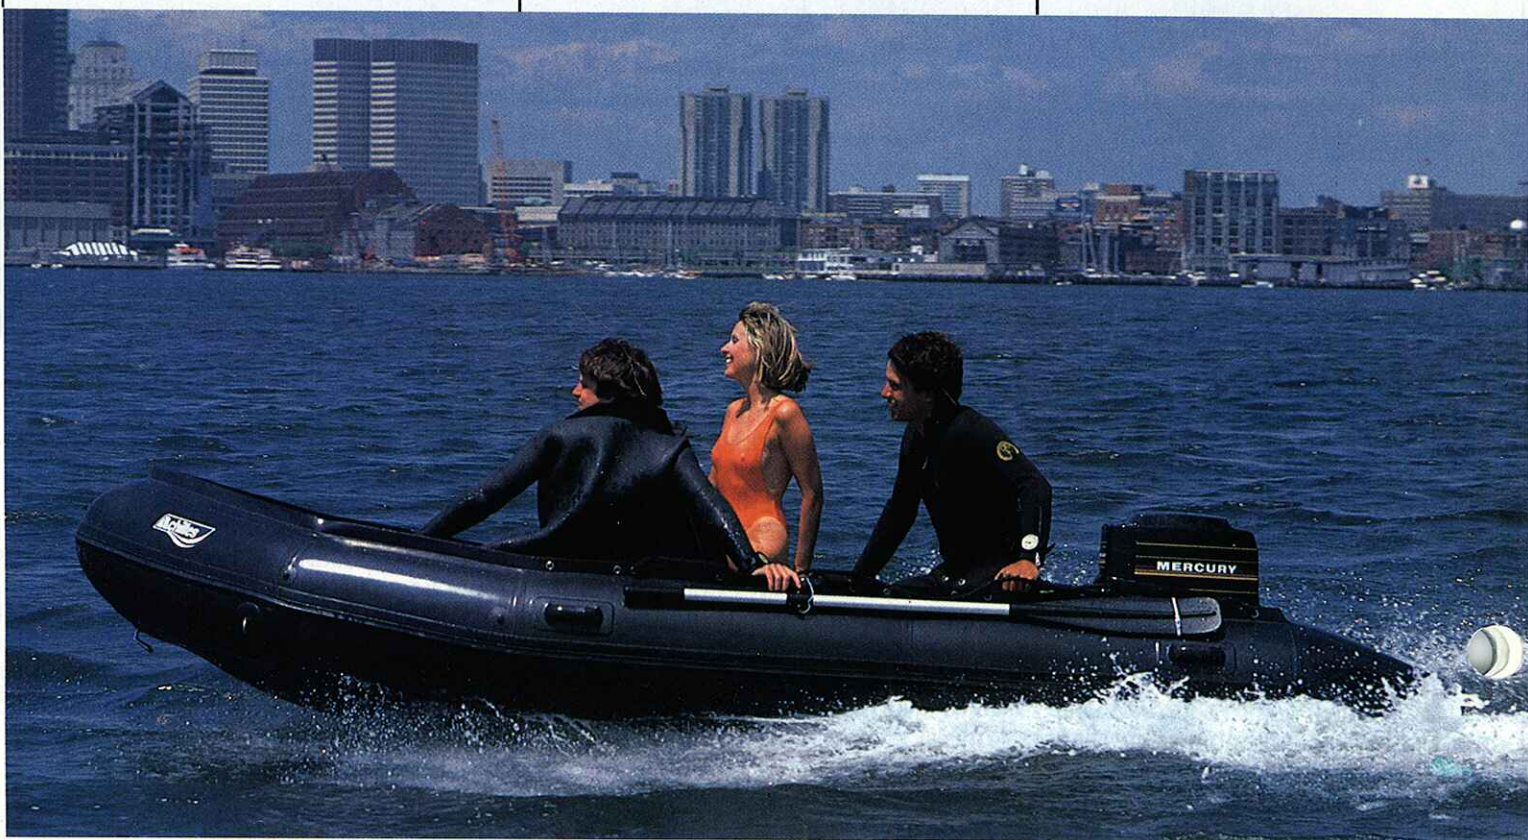

Hypalon is a superior additive for resisting damage from abrasions, punctures, oil, gasoline, or the wearing effects of the sun, ozone and warm salt water. And Achilles uses an industry high of 80% Hypalon.

Our Hypalon compound is then calendered through high pressure methods to Achilles own heavy-duty nylon fabric. This creates a denser, stronger fabric. We also use two layers of Neoprene inside for extra air tightness.

And each and every boat has Hypalon and Neoprene on all parts for top quality throughout.

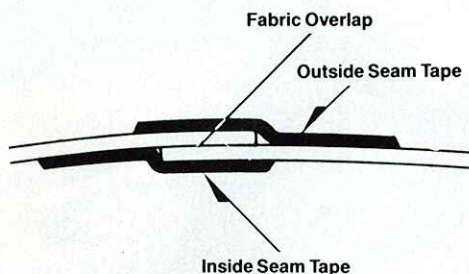

The end result is one tough, durable, airtight fabric found on all Achilles boats, from the smallest dinghy to the largest workboat.

TOPS IN DESIGN TECHNOLOGY

S SAFETY FIRST & FOREMOST.

Unlike others, we reinforce our seams inside and out with seam tape. Achilles also overlaps the fabric a full inch at the seams. Industry standard is usually one-half inch.

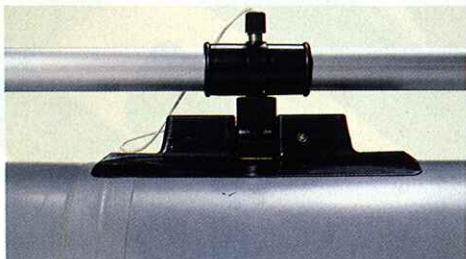

This seam construction plus our glue control method, uniform curing process and special valve design, help guarantee the most airtight boats in the industry. And our inflating valves are double-capped for extra safety.

S SUPER STANDARD FEATURES.

Achilles exclusive oar-lock system.

It allows you to fold down oars on top of tubes without being in the way even without the need of oar stoppers.

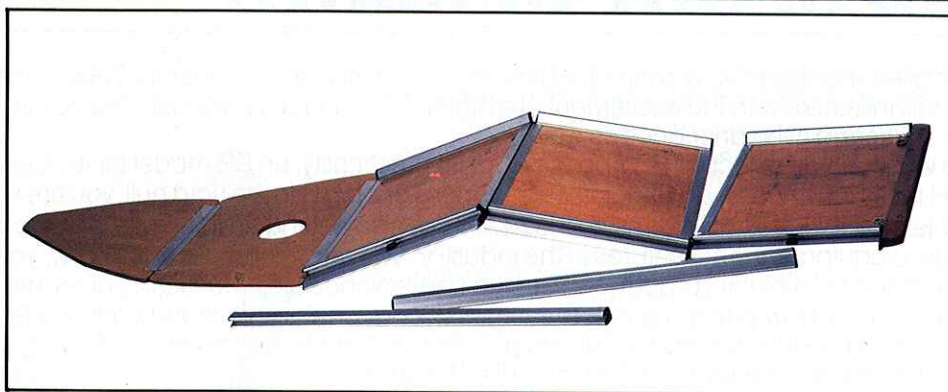

Achilles exclusive oar-lock system.

Deep "V" keel and bow rise.

Achilles deep "V" keel and bow rise design provides a fast and easy planing boat and a soft ride.

Self-locking floorboards.

Achilles was first to come through with this self-locking system that's so easy to put in and take out. For 1986, we're introducing aluminum floorboards in some sportboat models and offering them as options on some others. They're stronger and more durable, weather and water resistant, too.

Fiberglass transom and aluminum motor pad.

All our rigid transom boats have an extra strong aluminum pad to protect the transom and prevent engine ride up.

All Achilles boats have multiple separate air chambers for extra safety. Even if a chamber should become deflated, you'll remain safely afloat. You'll usually find at least one more chamber on an Achilles than on any comparable competing model.

Almost all our boats come with one or more seats specially designed to complement that boat and the uses it will encounter. These items and such features as extra bow rings for securing gear, safety grip handles, fuel tank fasteners, and motor mount pads have been added in response to consumer needs and suggestions.

At Achilles, our boats are people-oriented, not factory-oriented. We design and adapt our boats to meet the practical needs of boaters as opposed to designing them to conform to factory production capabilities.

Achilles multiple air chambers.

ACHILLES SPORTBOATS AND SPORT DINGHIES

All Achilles sportboats and sport dinghies are as versatile as they are fun. They combine all the advantages of a well-built inflatable with the excitement of a high performance sportboat. This results in not only faster rides, but safer, softer and even drier ones as well.

So whether you select an SE Sportboat for its practicality, an SR model for its sportiness, an SD for roominess, an SH for its toughness, an SK for its ruggedness or an HB for its rigid hull, you are sure of owning a versatile, reliable boat that really performs and lasts. You're also getting an inflatable with the widest range of standard equipment and features in the industry. With an Achilles Sport Dinghy, you get the performance of a planing sportboat with the convenience and practicality of an inflatable dinghy.

They row and tow with the greatest ease. With comfortable inflatable seats and fold-down, lock-type oar system. Compact, lightweight, they assemble in minutes. Yet they're extremely stable for easy boarding on and off large boats.

Solid wood transom for mounting motors and tube design allows these boats to go faster than regular inflatable dinghies and to rise up on a plane, even with very small motors.

And like all Achilles boats, they're made with both Hypalon and Neoprene added to their base nylon fabric.

Foot pump. Carry bag. Repair kit.

Interior bow rings.

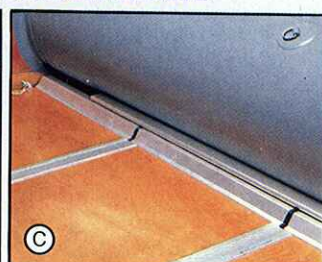

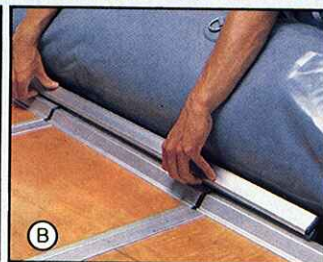

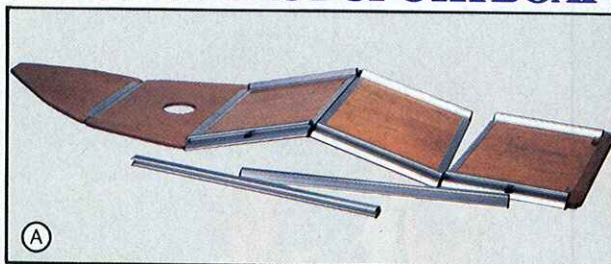

STANDARD FEATURES ON ALL ACHILLES SPORTBOATS AND SPORT DINGHIES

1. Open Bow Construction with Removable Bowdodger (SE, SD, SK, SHD, SPD Series and HB). Fixed Bowdodger and Windshield (SR, SHR). Both Bowdodgers come with support bar.
2. Reinforced Rubbing Strip of extra wide, thick molded rubber for protection all around the boat.
3. Combination Towing Ring and Bow Carrying Handle of solid metal. Painter Line included.
4. Two extra Towing "D" Rings on Bow (most models).
5. Life lines. Easily reached from inside or outside of boat.
6. Spray Deflector Trim for reducing spray over gunwales. Except SPD, LS Series and HB-100.
7. Advanced Lock-Type Oar Locks, Oars and Oar Stoppers.
8. Helmsman's Grip Handle for driving at high speeds.
9. Heavy-duty marine plywood sectional floorboards with high gloss varnish (on all sportboats and sport dinghies except SU, SH, SK and HB Series). SK Series has new aluminum floorboards and SU, SH Series have fiberglass reinforced floorboards. HB Series has a solid fiberglass reinforced floor.
10. Multi-purpose interior Bow Rings for securing holdalls and other items. Except SPD, LS and HB Series.
11. Bilge Drain. Self-bailing drain with rubber diaphragm check valve.
12. Solid Fiberglass-reinforced transom for strong support of high performance outboards. Except some SPD and LS Series.
13. Aluminum pad to protect transom and prevent engine "ride-up".
14. Lifting Handles for easy carrying.
15. Extra Large Check Valves for quicker inflation and deflation. One way airtight valve for inflation, capped for double safety. Cap and valve unscrewed together for fast deflation. (SU and SH Series workboats have recessed valves.)
16. Carrying Bag for easy stowing and storage.
17. High Volume Foot Pump.
18. Repair Kit.
19. Fuel Tank Fastener to solidly secure tanks and prevent any movement. Except SPD, LS. Optional fuel tank pad available.

FAST AND EASY SPORTBOAT FLOORBOARD ASSEMBLY

SR-140

- A. Achilles was the first to design the simple and quick self-locking floorboard system with support Aluminum (or wooden) stringers.
- B. Once the floorboards are placed in a partially inflated boat, the stringers are put in place and the boat inflated fully.

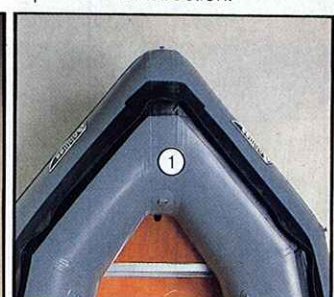

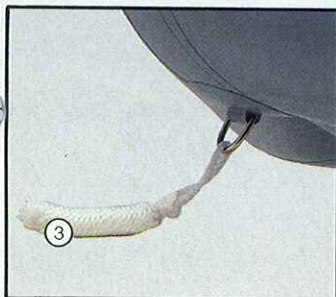

C. The pressure of the inflated tubes pushes the stringers into place and locks the floorboards firmly into position. This results in a better, more rigid floor. This method is the fastest and easiest available of any inflatable.

Sport Dinghies
Towing ring and painter line.

Foot pump.

Open bow construction.

Sportboats
Towing ring and bow carrying handle.

SR SPORTBOAT SERIES

With fixed bowdodgers and windshields as standard equipment, SR Sportboats represent our sportiest models. These all-purpose boats afford you all the versatility of a tough, roomy inflatable without sacrificing any of the excitement of a high performance sportboat. Now available in a striking yellow and grey color combination as well as in red, SR boats will rise up on a plane quickly and easily using a smaller outboard than rigid hull boats of the same size. And once you're underway in an Achilles SR Sportboat, you'll love the easy handling and superb maneuverability these sporty models provide. A range of accessories including steering system and sport seats is available to outfit your SR boat to fit your exact needs. Water skiing, scuba diving and fishing are only some of the uses you'll find for SR Sportboats. These versatile boats also make superb yacht tenders, runabouts and all-around utility boats.

SE SPORTBOAT SERIES

SE-12

SE-130

SE Sportboats make great all-around family fun boats and fish boats as well as outstanding economical tenders for larger boats. Their roominess and stability allow them to carry heavy loads of passengers and gear while their sportboat design provides high speed performance and superior maneuverability. Their unique

bow step guard allows you to step on the bow tube when boarding, unboarding or just out fishing. Another practical feature is Achilles famous fold-down oar lock system.

These sportboats are truly versatile.

SD SPORTBOAT SERIES

SD-124

Standard bowdodgers are easily removed to provide extra room as shown below.

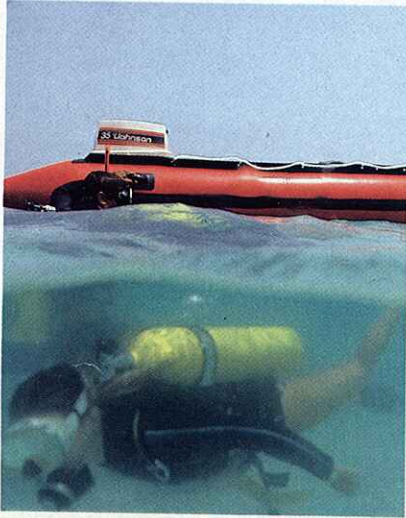

SD-140

It's difficult to imagine any boating need that tough, roomy Sportboats can't handle. Their excellent oar system and optional seating accessories make them superb tenders. Their roominess, stability and durability make them rugged utility boats. And their superior performance make them exciting, planing sportboats.

SD boats are a favorite of divers and fishermen because they can carry a lot of gear and are extremely stable. But when the fishing or diving is over they still have a high performance funboat for waterskiing or other uses.

An SD Sportboat is a logical choice for the boater who wants a boat that can do a little bit of everything.

NEW-SK SPORTBOAT SERIES

SK-140

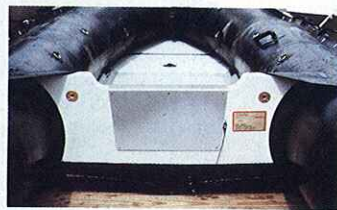

Achilles introduces Black Magic.

Rugged, roomy and ready for action. And they perform just as sleekly as they look. They are the perfect boat for divers. But they are also ideal as hard working utility boats.

They have all the features of Achilles' famous SD Series. Plus as a standard feature, new self-locking aluminum floorboards.

Black Magic's aluminum floorboards are a distinctive advantage. They make these boats more versatile. The more rugged the task, the more active the sport, the better. And since these floorboards are resistant to corrosion, there's no worry about damage from sun, salt water or chemicals and there is no painting or upkeep necessary.

If we had to describe Black Magic's terrific looks and superb performance in just one word, it would have to be: Macho!

Extra tough aluminum plate to protect transom from outboard motor.

SH SPORTBOAT HEAVY-DUTY SERIES

SH boats are made to take on any challenge. They can handle the rigors of rough seas or rough use. SH models are made with the same high performance design as our SR and SD Series Sportboats but have an additional heavy-duty layer of 840 denier nylon

throughout to double their strength. And these six ply boats deliver both sportboat maneuverability as well as workboat toughness. All SH boats have self-locking fiberglass reinforced floorboards and transoms. (Aluminum floorboards optional.)

SHR-170

Fixed bowdodger and windshield are standard on SHR models.

SHD-156

Recessed valves are a standard feature on all SH models.

Open bow and removable bowdodger are standard on SHD models.

**ACHILLES
6 PLY
TECHNIQUE**

SH Sportboats are made with a core of two layers of 840 denier nylon separated by a layer of Neoprene. The result is a stronger core than even a single ply fabric of equal (1680) denier. Add an exterior layer of tough DuPont Hypalon and two interior layers of airtight Neoprene and you have six layers of airtight strength unmatched in the industry.

HB RIGID HULL BOAT SERIES

HB-100

HB-126

Steering console system and seats are optional.

The new Achilles HB Series combine the safety, stability and buoyancy of an inflatable with the superior performance of a deep "V" rigid hull. And even with their rigid hulls, HB boats are still easy to transport and store due to their light weight, deflatable tubes and collapsible transoms.

The same heavy-duty, Hypalon-reinforced fabric used on our regular inflatables is bonded to a tough rigid hull. The result is a high performance powerboat which takes a smaller engine and has much more buoyancy and seaworthiness than a rigid craft while still providing the same maneuverability.

The HB-100 is a terrific tender and roomy runabout. It's fast, fun and easily fits on top of a car. Both HB's have multi air chambers (3 in HB-100 and 5 in HB-126) to make them virtually unsinkable.

The HB-126 has an advanced water ballast system with three separate hull compartments which keep weight forward longer so the boat will rise up on a plane quickly while keeping the bow lower for safety during acceleration.

The fiberglass transoms of HB boats fold down for easier transporting and storage than other rigid hull inflatables. The modified "V" hull design makes HB boats faster.

LS SPORT DINGHY SERIES

LS-4GX

This year, we're introducing the new LS-4GX, to win even more fans for this popular series. The LS-4GX is longer and roomier, so it can easily carry more gear or give passengers a little more room and comfort.

LS-4

SPD-AD, SPD-DX SPORT DINGHY SERIES

These Sport Dinghies have been best sellers for years and are now better than ever in '86.

All built with inflatable deep "V" keels so you can plane them for terrific sportboat performance.

Heavy-duty fabrics for rugged use plus fiberglass-reinforced transoms and aluminum stringers.

The SPD-4DX also has a larger tube diameter and wider beam for the ultimate in sport dinghy loading capacity and performance.

Whichever you choose, you get a practical dinghy and an exciting sportboat all in one.

SPD-4AD

SPD-4DX

SPD-FL SPORT DINGHY SERIES

SPD-4FL

Our classic SPD-2FL and SPD-4FL have been popular sellers for years. And to make this series even more versatile, we've just added the brand new SPD-5FL. It provides ample room for 5 passengers or lots of extra gear. All offer outstanding stability and generous carrying capacity. Thanks to their inflatable keels, full length wooden floorboards, wooden transoms, wide beams and large tube diameters. Whichever model you choose, you're getting a dinghy that doubles beautifully as a sportboat.

ACHILLES DINGHIES

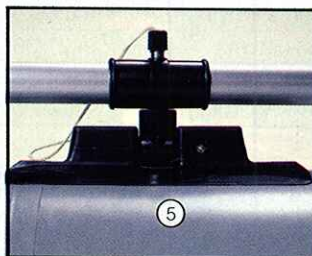

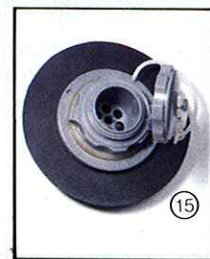

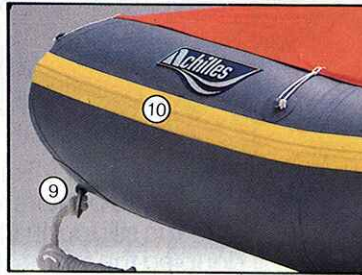

All fully equipped with a complete oar system, motor mount, and at least one seat (usually two) are standard on all our dinghies.

Achilles Dinghies are designed with raised bows and floorboards for ease of rowing. And you won't find a more advanced, functional oar system than the fold-down, locking system on every Achilles dinghy.

Like all Achilles inflatables, our dinghies are made with a tough nylon base reinforced on the exterior with Hypalon and Neoprene inside for toughness and airtightness. Light and compact, they assemble in minutes, store in a minimum of space and can even be kept inflated on the deck of your boat.

STANDARD EQUIPMENT ON ALL DINGHIES

1. Removable bowdodger: Reduces bow spray. Bright orange color for safety.
2. Forward Inflatable Seat: For rowing and added flotation for ST Series. DT Series has forward wooden seat.
3. Hinged Marine Plywood Floorboards for added stability. Fold up for easy storage when not in use. High gloss varnish. Plastic stringers reinforce the floorboards on ST models only.
4. Wooden Stern Seat with Velcro Fastener. Can also be used in bow section. (ST 4).
5. Lock-Type Oarlocks for easy rowing and smoother strokes. Greater maneuverability and no chance of "Oars Over Board."
6. Aluminum and Plastic Collapsible Oars. Specially made for Achilles Dinghies and Sport Dinghies.
7. Lifelines: Attached with stainless steel "D" rings fastened in thick molded rubber.
8. Oar Stoppers for additional oar support when not in use.
9. Towing Stainless Steel "D" Ring. Fastened in molded rubber with reinforced Nylon for stronger and safer towing. Painter line included. (ST-4 has three rings).
10. Reinforced Rubbing Strip: Extra wide, thick molded rubber for protection. Bright yellow color for safety.
11. Outboard Mounting Bracket.
12. Stern Lifting Handles for easier carrying on 4-man models only.
13. High Volume Foot Pump and Repair Kit.
14. Heavy-Duty Nylon Sea Bag: for easy stowing and storage.
15. Achilles Extra Large Check Valve for quicker inflation and deflation. Capped for double safety. For quick deflation, unscrew cap and valve together. Also includes (not shown) instruction manual.

LT-DX DINGHY SERIES

LT-3DX

This new Achilles line has been designed in response to boaters' demands for an economical, compact dinghy that is still tough enough to handle rugged chores. We have doubled the fabric of our LT Series, added unique "roll-up" wooden floorboards for extra compactness and portability, and added a new 8' two-man size.

LT-DX boats have a new "roll-up" wood floor which can stay in boats when they are deflated and put away. Rear wooden seat optional as shown on Page 29.

LT-2 DINGHY

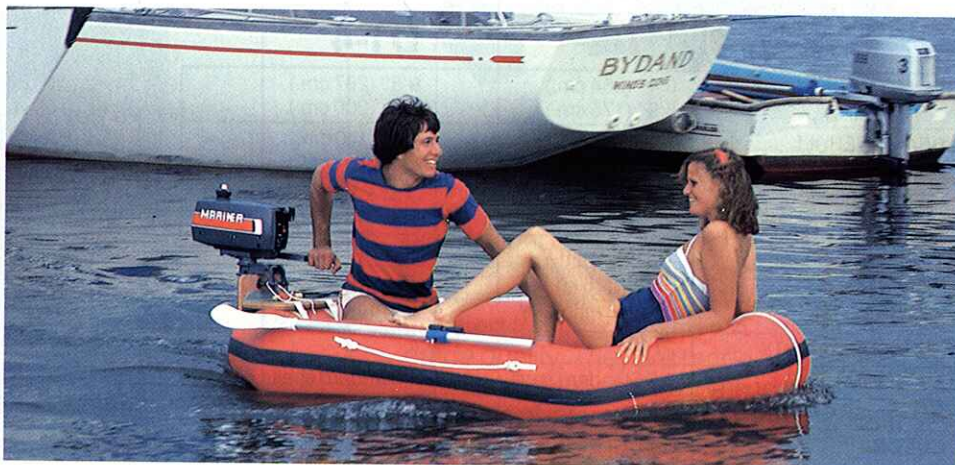

LT-2

A long time favorite of boaters requiring a small, convenient, economical dinghy that can be stored virtually anywhere and transported with incredible ease. Only 30 lbs., the LT-2 folds up into a compact, space-saving bag which can easily be stored in car trunks, campers or closets and transported by motorcyclists, bikers and even backpackers. Yet this attractive dinghy is still made with Hypalon/Neoprene for extra strength and durability.

DT AND ST DINGHY SERIES

The DT Series features classic lightweight dinghies with two heavy-duty wooden seats to ferry passengers comfortably to and from larger boats. Easy to store and transport. And like all Achilles boats, they're reinforced with both Hypalon and Neoprene for extra durability.

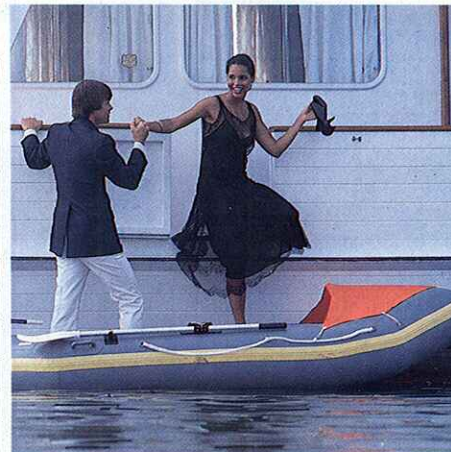

DT-4

The heavy-duty ST-4 represents as tough an inflatable as you'll find anywhere. Equipped with a wooden and an inflatable seat. With 3 stainless steel "D" rings for easy towing, marine plywood floorboards with plastic stringers.

RIVERBOATS

Achilles makes a complete line of riverboats for both professional outfitters and individual river-runners. Combining the world's most advanced inflatable craft technology with the expertise of top river-runners everywhere, Achilles has produced over fifteen models of rafts which provide every edge on the river. In addition to a high concentration of Hypalon over a tough nylon floor base, many additional standard features are built into every raft to add to their durability. Super strong floor, benches, reinforced seams, and specially designed reinforced "D" rings are all standard on Achilles white water rafts. We put everything into our rafts in the factory so you can get everything out of them on the river. Send for our Riverboat brochure.

FOUL WEATHER SUIT

For 100% waterproof protection, you need Achilles AS-400 Foul Weather Suits. Made from a super-protective, watertight coating of Neoprene over a tough 210-denier nylon shell and fully lined with taffeta, these suits represent the latest in foul weather fabric technology. All seams are heat-sealed for watertight strength. All closures are non-corrosive plastic or velcro. Available in a full range of sizes and colors for men and women.

WORKBOATS

Achilles produces a line of rugged workboats ranging up to 18 feet in length and 3,960 lbs. in load capacity. The Achilles SU Workboats are made with the same unique six-ply technique as our SH Boats for unparalleled strength and offer a variety of industrial features. Sturdy, lightweight aluminum floorboards, extra-heavy duty "D" rings inside and out, super wide tube diameters, recessed inflation valves, extra wide rubbing strake and many other features make Achilles workboats the best commercial grade inflatables available. Send for the Achilles Workboat brochure.

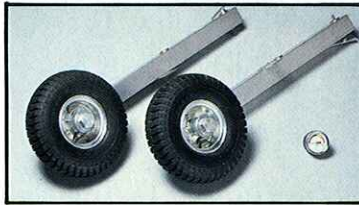

LIFERAFTS

Achilles distributes a line of high quality liferafts. These four, six and eight-man liferafts are available with either a single or double floor and feature water ballast for superior stability in rough seas. Compact and easy to store, Achilles liferafts represent the latest technology and are of commercial grade quality. They are made of Neoprene to insure airtightness and come in black with canopies of international orange. Send for our Liferaft brochure.
