## Boats Catalog

## THE BEST NAME YOU CAN PUT ON INFLATABLE BOAT

The Achilles boating experience begins with best inflatable boat fabric, designs and options and ends with unsurpassed customer support for as long as you own your boat. In between you will enjoy years of on-the-water activities in the most durable inflatable boat you can find.

**It begins with the best fabric:** Our quality CSM fabric has such a great reputation in the inflatable boat industry that other inflatable boat manufacturers buy their fabric from us. It all starts with an exterior coating of our custom CSM over a heavy duty fabric which makes our inflatables virtually impervious to the elements, oil, gasoline and abrasions. It ends with two interior coatings of Chloroprene for unsurpassed air retention.

**Designed and built with safety and performance in mind.** From built-in safety features like the strongest four-layer seam construction in the industry to custom designs engineered to complement and enhance the performance of each of our boats, boaters get more out of an Achilles. Our boats are built to not only last, but to also deliver the practicality you expect from an inflatable without sacrificing the performance you want from any boat.

GREAT QUALITY IN COMPACT PACKAGES THAT ARE EASY TO CARRY, STORE AND INFLATE.

A FUNCTIONAL, VERSATILE, SPORTY LINEUP OFFERING A VARIETY OF FLOOR AND DESIGN OPTIONS

**Because our boats last, so does our support.**

We provide our dealers and customers with comprehensive and responsive post-sales support in every aspect of Achilles ownership. Our customer and mobile-friendly web site not only offers comprehensive information about our current models, but also on all Achilles boats produced since 1978.

**Full five years warranty on fabric and seams.**

We back our claim to having superior fabric and construction with a strong warranty commitment.

**Achilles Work & Rescue Boats** Achilles produces heavy-duty workboats and rapid deployment rescue boats.

**Achilles Riverboats** Achilles produces a complete line of CSM riverboats.

**Unsurpassed Seam Construction**

Our seams are overlapped a full inch and reinforced with seam tape both inside and out. No one else takes so many steps to ensure seams will last.

**A smooth, simple Oar system:**

We invented the folddown, locking oar system that makes rowing a breeze while keeping oars secured and out of the way when not in use.

**Non-Corrosive Check Valves:** All Achilles valves are noncorrosive with no moving parts that might break. They are engineered for easy “one-way” inflation and instant deflation.

## A LOT OF QUALITY IN A COMPACT PACKAGE

These two and four person boats go from their handy carry bags to fully equipped dinghies in just minutes. Compact enough to be stored virtually anywhere, they are safe, durable and dependable dinghies capable of carrying substantial loads. They come fully equipped with fold-down oar system, wood seat, fold-up floor and motor mount. Even though they are our most economical boats, they are made with the same durable Achilles CSM fabric and four-layer seam construction, and backed by the same five-year warranty as our large sport boats.

# LS-RU 2 | 4

## UNSURPASSED CONVENIENCE OF A LIGHTWEIGHT, ROLL-UP TENDER

Both our LS-RU rollup tenders can be stowed in a space just 10" high. With a roll-up wood/Achilles CSM fabric floor and solid transom, they can be inflated and ready to go in minutes. When they are, they deliver surprisingly large load and person capacities. Easy to carry, easy to set up, easy to store – the LS-RU.

# LEX 77 | 88 | 96

## THE CLASSIC INFLATABLE LOOK AND FUNCTIONALITY

LEX boats represent the culmination of many subtle refinements over the years that have kept them current while maintaining their traditional appearance. A sleek bow design and ample interior space come together in this classic tender. A teardrop rub strake deflects spray and improves protection from the inevitable collisions with docks and boat hulls. Additional features include a painted wood seat and a full sectional wood floor. They all add up to a solid, reliable tender that combines practicality and performance in an economical package.

# SPD-E

290 | 310 | 330

## THIS LONGTIME LINEUP STAPLE IS NOW BETTER THAN EVER

We have never stopped improving our SPD boats, which is why they have remained popular with boaters for so long. That commitment continues with recent design enhancements. Lateral seam tube construction gives these classic inflatables a more modern, stylish look. Rope lifelines are replaced with webbed handles and a helmsman grip for a cleaner appearance. The three rear floorboards are now aluminum to reduce maintenance and increase durability. The classic features boaters love remain: large diameter tubes for greater load capacity and performance, a removable aluminum rowing seat, and an air keel/floor joint system for a more rigid floor.

## THE CONVENIENCE OF AN ALUMINUM FLOOR THAT CAN STILL ROLL UP

These super convenient boats feature a unique aluminum rollup floor which makes it a snap to get them in and out of the water quickly and easily. This is combined with an inflatable keel and V-shaped fiberglass-encased transom to enhance performance. Large 17" tubes allow the LSR tenders to carry heavy loads. Add in the improved performance provided by the Performax end cone design, and you have a roll-up tender that is tough to beat.

# HB-FX 270 | 300

## A RIGID HULL BOAT THAT'S EASY TO TRANSPORT, CARRY, AND LAUNCH

The Achilles HB-FX boats feature a unique folding transom, lightweight design, and full-length carry bag that combine to make these rigid hull models the easiest to transport and launch. Despite their lighter weight, both these popular FX models offer large load capacities and the ability to carry four people. The Achilles HB-FX series offers boaters the most versatile and convenient RIBs available.

# HB-LX 240 | 280 315 | 350

## A LIGHTWEIGHT SERIES PACKED WITH HIGH PERFORMANCE FEATURES

The Achilles HB-LX boats provide the critically acclaimed performance of the Achilles HB-DX deep "V" fiberglass hull design in a lighter RIB. They also have the same tube design as the HB-DX series, yet a modification of the deck design and removing the bow locker results in a RIB that is on average 25% lighter than the same size HB-DX model. This means they can perform better with smaller engines and can be carried or transported more easily. Despite their lighter weight and lower cost compared to the HB-DX series, they are still loaded with all the high quality standard features for which Achilles is known.

MODEL	COLOR	LENGTH	INSIDE LENGTH	BEAM	INSIDE BEAM	TUBE DIAMETER	WEIGHT	LOAD CAPACITY	PERSON CAPACITY	RECOMMENDED H.P.	MAXIMUM H.P.	AIR CHAMBERS
HB-240LX	Pearl Gray	7'10" (240 cm)	5'8" (172 cm)	5' (153 cm)	2'5" (73 cm)	16" (40 cm)	86 lbs (39 kg)	900 lbs (410 kg)	3	5 (2-5) Standard	5 Standard	2

HB-LX STANDARD FEATURES INCLUDE: Achilles CSM reinforced fabric; four-layer seam construction; deep "V" fiberglass hull; full length teardrop rubbing strake; removable aluminum rowing seat (except HB-240LX which has a wooden seat); towing bridle D-rings; stainless bow eye; lifting hardware for davits; bow carry handle; webbed passenger, helmsman, and rear carry handles; interior oar straps (except HB-240LX); fold-down locking oar system with two-piece breakdown aluminum oars and oar holders; gas tank tie down hardware; protective transom motor clamp plate; extra seat attachment patches (except HB-240LX); bailer valve; foot pump; and maintenance kit.

# HB-DX 280 | 315 350 | 385

## A RIGID-HULLED INFLATABLE THAT GIVES YOU A LITTLE EXTRA

If you want to take a step above the norm in a hard-bottom tender, step up to a deep "V" fiberglass hulled Achilles HB-DX. We've added a vented bow locker that can accommodate a gas tank while also serving as a seat to these sleek, topline RIBs. A sealed tube from the bow locker to the transom drain allows a fuel line to be run under the deck. This frees up deck space previously taken up by the fuel tank and fuel line, and also provides better weight distribution by having the weight of the gas tank in the bow. Like every Achilles boat they are made with our own Achilles CSM fabric so they can handle the burning sun of the tropics or the cold northern waters without fading or deteriorating. Choose a rigid-hulled inflatable that gives you a little extra. Choose an Achilles HB-DX.

## A VERSATILE UTILITY BOAT THAT'S READY TO GO IN MINUTES

Designed originally as rapid response boats for fire departments and rescue units, these unique aluminum roll up floors with an innovative hinge system and non-skid panels can perform a variety of functions. They are easy to store or carry and can be set up in minutes. The main air chambers are equipped with over pressure relief valves so they can be inflated either by compressed air bottles or the standard equipment foot pump. In addition to their Achilles CSM fabric and four-layer seam construction, other special features like abrasion wear patches and removable storage bags make them practical alternatives for tackling a range of jobs on the water.

## THESE "TOP-OF-THE-LINE" MODELS CONTINUE TO SET THE STANDARD FOR INFLATABLE SPORT BOATS

Achilles SG sport boats bring performance and practicality together for better diving, fishing, or all-around sport-boating pleasure. They are also perennial rescue and emergency boat favorites of fire departments, first responders and others around the world. Achilles SG boats offer a roomy, square bow configuration which provides room for extra gear, and an aluminum and fiberglass floor system\* which delivers superior rigidity and durability.

**FRB-104**

Our **SG-140SV** model shares most of the same standard features and specifications as our traditional SG-140 model, but incorporates intercommunicating valves and over-pressure relief valves in all the main air tube chambers. These additions give the end user the ability to inflate the entire boat (except for the keel) from a single inflation point using an SCBA or SCUBA compressed air bottle or tank. It also allows for each chamber to be isolated in the event of damage to one of the chambers. This new inflation system is completely internal so there are no external hoses or hardware to get in the way. Although this is our first offering in the SG-SV series, we anticipate additional features and sizes to be added in the future.

## BUILT TOUGH TO WORK HARD FOR RUGGED PRIVATE AND COMMERCIAL USE

SU boats are made with an additional heavy-duty layer of 840-denier nylon Achilles CSM fabric in a two-ply technique which results in a fabric even stronger than a single base fabric of equal thickness. A number of commercial grade features such as recessed valves and a full-length, protective wear patch combine to make these boats the right choice for the toughest marine uses.

SU STANDARD FEATURES INCLUDE: Achilles CSM reinforced fabric; four-layer seam construction; extra durable double layer (840 denier each) nylon core fabric; air keel; aluminum and fiberglass floorboards and heavy duty aluminum stringer system; fiberglass encased transom with aluminum plate and motor pad; fuel tank tie-downs; heavy duty bailer sleeve and two (2) bailer valves; extra-wide, heavy-duty, full-length teardrop rubbing strake; tie-down straps for paddles; bow handle; towing bridle D-rings; lift and carry handles; splash guard with life lines; heavy-duty reinforced cargo wear patch all around; extra tie-down D-rings; heavy duty recessed valves; heavy duty lifting points (hull and transom); two (2) high-volume large foot pumps.

# BOATS PARTS

The fabric and construction of Achilles boats deliver long-lasting durability that is hard to match. As a result, longtime Achilles owners may occasionally need to replace parts. If you have any questions about replacement parts or need to place an order, please contact an authorized Achilles dealer. To find a dealer near you, use the dealer locator on our website, where you'll find a full list of our authorized locations.

The selection below is just a small sampling of our most popular O.E.M. parts. A complete parts list is also available on our website.

Achilles boats are manufactured to meet or exceed ISO-6185 standards for inflatable boats. This ensures that they are manufactured to the safety and production manufacturing processes associated with those standards. They are also Transport Canada approved.
